

Task:1

Name: Maheen Zehra

Time: 1 Hour |  Marks: 10 |  Deadline: 48 Hours

 Class Slot: Friday — 6:00 PM to 9:00 PM

 Instructor: Sir Hamzah Syed

AIDD 30-Day Challenge — Task 1

Reflection Activity:

- **What does AI-Driven Development mean to you?**

Answer:

For me, AI-Driven Development is a method that makes my coding work easier. I don't need to write the code myself; I just need to specify which functions and features I want in my website or app. The AI takes care of all the remaining coding. After that, I only need to check whether the code is correct or if there are any mistakes. If there is a mistake, I fix it. AI-Driven Development is very helpful for me because it makes my work faster and easier, and it also saves my time.

- **How do you see the future of Human–AI Collaboration in software development?**

Answer:

According to me, the future of Human–AI Collaboration in software development is about humans and AI working together as partners. Humans will focus on design, problem-solving, and deciding what the software should do, including which features and functions are needed, while AI will handle writing code, testing, and repetitive tasks. This collaboration will make development faster, less

error-prone, and more creative, shifting the developer's role from typing code to guiding, reviewing, and refining AI-generated work.

Self-Test (MCQs):

What is the main purpose of the AI-Native Era?

- a) Replace developers
- b) Empower developers through AI tools ☒
- c) Eliminate coding
- d) Automate testing

2 What defines an AI-driven developer?

- a) Writes only syntax
- b) Creates context-aware prompts ☒
- c) Avoids tools
- d) Works offline

3 What does “AIDD” stand for?

- a) AI-Integrated Data Design
- b) AI-Driven Development ☒
- c) Automated IDE Deployment
- d) Adaptive Input Debugger

4 What is the focus of Evaluation-Driven Development (EvDD)?

- a) Manual coding
- b) Evaluating and improving AI outputs ☒
- c) UI design

d) Testing only

5 What should developers focus on in the AI era?

a) Syntax only

b) Building reasoning + evaluation skills 

c) Avoiding AI tools

d) Manual workflows
